Overview

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels cost between \$24,000 and \$36,000. Understanding the cost and the number of solar panels needed for a 1000 sq ft home requires evaluating several key factors: energy consumption, panel efficiency, roof orientation, and local climate. This updated 2026 guide breaks down everything you need to know. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor.
