## Overview

---

As of 2026, the average cost of residential solar panels in the U. This typically translates to about \$2. 50 per watt of installed capacity (more on price per watt below). Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Estimate your solar energy production per m<sup>2</sup> with accurate calculations for any location. Free calculator with multiple units, efficiency modes, and detailed visualizations. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. In this guide, we'll break down average solar costs per square foot in 2025, show how they compare by home size, explain why this metric has limits, and give you expert tips to reduce your price. solar cost per square foot in 2025: \$6 - \$12 after the 30% federal tax credit.
