# **500kWh Off-Grid Solar Container for Wastewater Treatment Plants**

## Overview

---

A ready-to-install 2-3 kVA power module with 4-6 solar panels and lithium battery storage. The 500KW to 1MW off-grid solar power system is a high-capacity renewable energy solution designed for remote locations, industrial sites, and large-scale applications. It provides reliable, independent power generation with advanced battery storage and inverter technology, ensuring stable. It features a three-level battery management system that ensures robust protection against overcharging, over-discharging, and over-voltage. The modular design enables easy expansion and front maintenance, while a built-in local monitoring EMS allows for remote oversight. This significant achievement not only marks a step forward in the company's commitment to environmental responsibility but also sets a new.
