# **Airport uses 120kW British power cabinet**

## Overview

---

A fire late Thursday at a nearby electrical substation cut off the power supply to Heathrow, bringing flights to a standstill for almost all of Friday. While backup systems kicked in, they only allow the hub to land some aircraft and evacuate passengers, but not to support full. The North Hyde substation fire in Hayes, London, on March 20th caused a power failure at London Heathrow Airport which left 200,000 passengers stranded, along with canceling more than 1000 flights. Although the cause of the fire remains under investigation, global airports are now reviewing their. Bowers Electricals Ltd has recently dispatched two new 1250kVA, 11000/415V ONAN distribution transformers from its factory, destined for Teesside International Airport. North Hyde feeds. Many airports are protecting against power outages by adding microgrids using solar and other energy sources. government, unless noted otherwise. Coal-Burning Aircraft?

□ Back-of-the-envelope. (Bloomberg) -- London Heathrow's unprecedented blackout on Friday has put the airport's reliance on potentially vulnerable infrastructure into focus, at a time when the biggest UK hub is lobbying for an ambitious expansion plan.
