When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best. Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar thermal technologies use sunlight to heat water for domestic uses, to warm buildings, or heat fluids to drive electricity-generating turbines. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability.
