

KREATYWNY ENERGY POLSKA

Amman electric vehicle adoption

Overview

EVs now account for a 55% share of Jordan's total vehicle imports, and local uptake has grown significantly, from just 800 EVs in 2016 to over 150,000 by April 2025. Hybrid vehicles also maintain a strong presence, totaling 225,000 units by the end of 2022. Amman, June 3 (Petra) – The "Electric Mobility Adoption in Jordan" project represents a pivotal milestone in advancing electric transportation in the Kingdom, particularly amid the accelerating global shift toward clean energy, according to Bilal Shaqarin, Director of the Climate Change and Green. Global EV adoption continues to rise, but empirical understanding of the behavioral and contextual determinants in emerging, energy-dependent economies remains limited. This study addresses this gap by examining the key drivers and barriers of EV adoption in Jordan through a mixed-methods approach. Jordan's automotive market is undergoing a dynamic transformation, driven by a remarkable surge in electric vehicle (EV) adoption. While small in regional scale, Jordan has emerged as a leader in EV penetration across the Middle East, offering compelling opportunities for U. This dramatic shift reflects the country's commitment to sustainable transportation and its ambitious goal of having 30% of all vehicles on its roads be.
