## Overview

---

When it comes to solar panels, angle matters more than you think. This guide breaks down the best angles, how they work with the sun's path, and practical tips to set up your. Historically, the advice for finding the best angle for solar panels has been to set your tilt angle equal to your latitude. According to the Department of Energy (DOE), south-facing solar panels perform best when tilted between 15 and 40 degrees.
