# **Are photovoltaic panels harmful when used as roofs**

## Overview

---

Solar panels themselves are not inherently bad for roofs. When professionally installed and maintained, they can protect and even extend roof life. The key is ensuring the existing roof is in good condition, installation follows best practices, and ongoing maintenance is regular. Many misconceptions exist around solar energy, including that solar panels produce harmful radiation, pose a chemical exposure risk, and can be a cause of fires. These misconceptions create unnecessary anxiety for homeowners wanting to switch to a clean, renewable energy source. Recycling programs for solar panels help manage end-of-life. Little do people know that solar energy systems can be dangerous to their health, due to the EMF's emitted. Here, we'll explore the potential downsides of adding solar panels to your roof and what you should know before making the leap. Roof Damage During Installation One of. The answer here is almost always yes; however, the following safety considerations should be reviewed to determine the condition of your roof before moving forward. Do your research before hiring a solar installation company.
