Battery cabinet panels supply power to the sun

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.

Overview

Solar and battery storage systems combine solar panels with battery units to store energy generated from sunlight. This setup allows homeowners to use solar power even when the sun isn't shining, providing a reliable and eco-friendly energy source. This section is your guide to how batteries work, the different types of batteries, and why it's a good idea to add one or more batteries to your solar. When combined with a solar system, it's an intelligent system that gives you unprecedented control over how you store and use electricity. The equation is simple: maximize your home's solar energy usage to minimize grid electricity purchases.
