# **Beer bottle solar power generation**

## Overview

---

Here, we highlight six inspiring examples of breweries across the spectrum that have successfully integrated solar solutions, demonstrating that going green is excellent for business. The energy-intensive nature of brewing and distilling operations creates opportunities for solar cost savings. The Brewers. And incorporating solar in its energy mix is one of the significant steps food and beverage companies nationwide are taking to reduce the cost of rising electric bills while taking measurable steps toward reducing emissions. And this is your guide to helping your beverage manufacturing company do. Riggs Beer Co. in Urbana, IL, is leading the charge in sustainable brewing. The energy required to heat mash, boil wort, and maintain precise fermentation temperatures accounts for a large. In 2018, we made a power purchase agreement (PPA) with Lightsource BP to fund, develop and operate solar installations that generate enough renewable electricity to brew all our beers in the UK, connecting to the grid in 2020.
