

Berlin New Energy solar Panels

Overview

The plan defines a series of measures with the goal to produce at least 25 per cent of the electricity generated in Berlin from solar energy by 2035. Last year, 15,318 new installations were added, according to the Senate Department for Economics and Energy, citing preliminary figures. In the previous year, the figure was a good 10,800. The output of all solar installations, which is given in megawatt peak (MWp), rose to almost 379 across Berlin. Berlin's mandate for solar installations on new and renovated roofs has spurred rapid rooftop expansion, but the German capital remains far from its 2035 clean energy goal. But while the number of PV systems has tripled in the German capital since the start of the solar mandate in 2023, Berlin's ambition to increase. Photovoltaics (PV) makes an important contribution to supplying the capital region.

Berlin New Energy solar Panels

City of Berlin's solar mandate drives surge in rooftop photovoltaics

Berlin introduced the solar mandate to unlock the city's rooftop solar potential and contribute to climate goals. Since 1 January 2023, new buildings and major roof renovations on ...

Berlin Pioneers New Market for Urban Solar Power

In Germany, affordable balcony panels are now a trend. More than 360,000 have been registered since 2023, according to the national energy regulator, with Berlin as a hot spot.

Smart Cities World

Berlin is embarking on the next phase of its solar expansion with the new master plan Solarcity 2025-2030. The goal is to produce at least 25 per cent of the electricity generated in Berlin ...

Berlin solar mandate drives rooftop PV installations

Berlin's mandate for solar installations on new and renovated roofs has spurred rapid rooftop expansion, but the German capital remains far from its 2035 clean energy goal.

35 Top Renewable Energy Companies in Berlin · January 2026

Detailed info and reviews on 35 top Renewable Energy companies and startups in Berlin in 2026. Get the latest updates on their products, jobs, funding, investors, founders and more.

Cheaper, cleaner energy drives Germany's balcony-solar boom

The home-fitted renewable-energy sources are inexpensive and easy to install, and reduce electricity costs. Here's what can be learned from their surging popularity in Germany.

Berlin makes progress with solar expansion

Berlin continues to increase the expansion of solar energy. Last year, 15,318 new installations were added, according to the Senate Department for

Economics and Energy, citing ...

Berlin-Brandenburg is a pioneering region in the energy transition.

The expansion is also picking up speed in Berlin: In 2024, approximately 12,600 new PV systems were installed - more than ever before - with a newly connected capacity of 68 MWp and a total installed ...

ESMT Berlin installs the largest photovoltaic system in Berlin

With a total of 893 highly efficient modules on the former GDR State Council building, the PV system achieves a total output of 366 kWp, making it the largest system of its kind in central ...
