Brand new outdoor power field in Seychelles

Overview

With commissioning planned for 2026, the Seysun Lagoon project will play a pivotal role in helping Seychelles achieve its goal of sourcing 15% of national electricity from renewable energy by 2030, while also setting a benchmark for floating solar innovation in the Indian Ocean and. With commissioning planned for 2026, the Seysun Lagoon project will play a pivotal role in helping Seychelles achieve its goal of sourcing 15% of national electricity from renewable energy by 2030, while also setting a benchmark for floating solar innovation in the Indian Ocean and. Mahé, Seychelles, 30 September 2025 - Independent renewable energy company Qair has officially launched construction of the Seysun Lagoon Floating PV plant, an ambitious 5.8 MW project located in the Providence Lagoon on Mahé Island. The ceremony was held in the presence of Flavien Joubert. Seychelles' renewable energy capacity is set to expand significantly with the Seysun Lagoon Floating PV Project, a 5.8 MW project. Known as the Seysun Lagoon Floating PV project, the facility is a flagship initiative in the national renewable energy roadmap. Seychelles' main power station, located at Roche Caiman on Mahe Island, is to be expanded by 18MW, the Public Utilities Corporation (PUC) announced recently. With the installation of two new 8MW generator sets, this will bring the total capacity to 92MW at that particular power station, with the. Summary: Discover how Battery Energy Storage Systems (BESS) are transforming Seychelles' outdoor power infrastructure. This article explores renewable energy integration, cost-saving strategies, and real-world applications tailored for island nations. 8 million euros, was initiated following a contract agreement.

Brand new outdoor power field in Seychelles

Qair kicks off construction of floating solar power plant in Seychelles

Qair launches construction of the 5.8 MW Seysun Lagoon floating solar power plant in Seychelles, set for commissioning in mid-2026.

Roche Caiman power station soon to undergo an 18MW expansion

The Public Utilities Corporation (PUC) has announced its upcoming initiative to expand the Roche Caiman power station by an additional 18MW through the installation of two new 8MW ...

Seychelles' main power station to be expanded by 18MW by 2025

Increasing Mahe's generator capacity is one of the main goals of this expansion project, which aims to meet the growing demand for power. PUC hopes to lessen its dependency on older ...

Seychelles Outdoor Power Supply BESS: Powering Island

Sustainability

Summary: Discover how Battery Energy Storage Systems (BESS) are transforming Seychelles' outdoor power infrastructure. This article explores renewable energy integration, cost-saving strategies, and ...

Seychelles renewable energy: Unique 2030 boost is impressive

Seychelles' renewable energy capacity is set to expand with the Seysun Lagoon Floating PV Project, a 5.8 MW floating solar installation near Victoria on Mahé Island.

Seychelles to Launch Africa's Largest Floating Solar Project

Seychelles is set to launch Africa's largest floating solar farm by 2025. Learn how this 15 MW project will advance renewable energy, cut emissions, and boost energy security.
