# **Can a 12v inverter 2200 drive a 1800w device**

## Overview

---

A 2000-watt inverter can reliably power medium-sized appliances and tools requiring up to 1600-1800W continuous load, with surge capacity up to 4000W for 1-3 seconds. Typical applications include microwaves (1000W), refrigerators (600W), power tools (1200W), and small air. Is there a 12v all in one with at least a 1800w inverter?

Is there a 12v all in one with at least a 1800w inverter that is recommended?

On a boat usually. Not going to have much luck with that. The top end of the 12v systems are about 1,000W and 1800w is really pushing a lot of amperage, like near. A 1800 watt portable power station (with about a 1.8 kW inverter and a 1024 Wh battery") offers a sweet middle ground between compact units and full-home systems. I presently have my refrigerator, microwave, and 24 inch tv (insignia from BB if that matters) plugged into it. 12v. High-Quality Pure Sine Wave Inverter: Equipped with premium pure copper inductance and advanced filtering technology, delivers a stable 1800W true pure sine wave AC output, peaking at 3600W, 60Hz, high frequency, converts 48V DC to 110V/120V AC, providing full Pure Sine Wave power output. A quick rule is to divide watts by 10 for 12V systems or 20 for 24V systems. Below is a summary table.

### Is there a 12v all in one with at least a 1800w inverter?

Yes, and nobody makes an All-In-One that does 1800w on a 12v system. To get 1800w out at 120v you still have to

get the 1800w in on the 12v side, which is where all the high amps and fat ...
