

# **Can photovoltaic panels be laid flat on the ground**

## Overview

---

Yes, solar panels can be installed flat. The biggest advantage of ground-mounted solar panels is that they offer greater control over the direction and angle of the solar panel. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Can I just set the panels on the ground?

I have a certain amount of space to put panels in my yard. Example: For Denver with a 1KW array: Flat on ground: 163 KWH/mo summer, 60 KWH/mo winter, and 1365 KWH per year Tilted 40 deg: 145 KWH/mo summer, 125 KWH/mo winter, and 1672 KWH per year So, you lose about 18% on a yearly basis in. Flat roof solar panels are no different. I get that wind can be a big concern, and I know there are other reasons why this might not be the best idea, such as affecting the panels' lifespan. US-based energy technology developer, Erthos, is a clear example of a company investing heavily in flat PV panels.
