

# Can photovoltaic panels be mounted on the wall

## Overview

---

Yes, solar panels can be mounted on a wall, either attached parallel to it, tilted at an angle, or hung as a canopy. This is usually a good option for properties with an unsuitable roof for solar panels - whether it's because of poor structural integrity or excessive shade. However, in [Installation Tips](#), [Advantages of Vertical Mount](#) and [More Home solar energy system owners](#) have traditionally focused on installing panels on rooftops. This guide explores. Can solar panels be mounted on a wall?

Are wall-mounted solar panels as effective as roof-mounted solar panels?

Which properties are most suited to wall-mounted solar panels?

How much do wall-mounted solar panels cost?

How long does it take for wall-mounted solar panels to be installed?

Should you. A solar panel wall mount is a mounting system that secures solar panels onto walls.
