Canberra Communication Base Station Supercapacitor Project

About Canberra Deep Space Communication Complex

Located at Tidbinbilla, just outside Australia's capital city, the Canberra Deep Space Communication Complex is one of three Deep Space Network stations around the world. The ...

The Big Canberra Battery , Williamsdale Energy Storage System , ITP

The project will deliver an ecosystem of batteries across the ACT to ensure its electricity grid remains stable, and will help to future-proof the state's electricity security.

NASA's Deep Space Network Starts New Dish, Marks 60 Years in ...

In addition to constructing more antennas like Canberra's Deep Space Station 33, NASA is looking to the future by also experimenting with laser, or optical, communications to enable ...

Big Canberra Battery a step closer

The Big Canberra Battery project has reached another milestone. A transformer was delivered to the Williamsdale construction site this week. The transformer makes sure the electricity ...

Neighbourhood batteries power up as part of Big Canberra Battery Project

Delivered in partnership with Evoenergy, these three batteries are part of the ACT Government's Big Canberra Battery project and are funded through the Australian Government's ...

Powering up Canberra's Grid

The Big Canberra Battery will deliver at least 250 megawatts of power, enough stored renewable energy to supply one-third of Canberra for two hours during peak demand. It will help ...

Big Canberra Battery - Williamsdale BESS

This allows renewable energy to flow to homes and business across Canberra when demand is high and solar

generation drops. Construction is now underway on concrete bases for the ...

Big Canberra Battery Co-Design Workshop Report

The Project fulfills an ACT Government commitment to deliver at least 250 MW of new 'large-scale' battery storage (LSBS) distributed across the ACT. This "battery ecosystem" could include a small ...

NASA starts new dish for its Deep Space Network, marks 60 years in Canberra

CANBERRA, Australia - NASA's Deep Space Network facility in Canberra, Australia celebrated its 60th anniversary on March 19 while also breaking ground on a new radio antenna.

About Canberra Deep Space Communication Complex

In addition to constructing more antennas like Canberra's Deep Space

Station 33, NASA is looking to the future by also experimenting ...

A Gigantic New NASA Dish in Australia Is Set to Transform Space

The newest addition in Canberra, called Deep Space Station 33, will be a 112-foot (34-meter) wide multifrequency beam-waveguide antenna. Most of the structure will be built ...
