Communication Green Base Station Emergency Rescue

Overview

The DVRS is a small and rugged radio base station that improves portable radio coverage for firefighters while keeping them connected to the network. Transform the way incident command accounts for people on-scene with the right tools. Requires a single analog (POTS, PBX, or central office phone line) or digital phone line. If used on an IP or cellular network, you must. Access to reliable communications services is a key factor in any emergency situation. We seamlessly transform fragmented 9-1-1 audio, radio traffic and video into a verified stream of intelligence. Connect call takers, dispatchers and. Motivated by these situations, in this paper, we provide a state-of-the-art survey of the current situation and development of emergency communication networks.
