

# Current energy storage project prices

## Overview

---

Battery storage prices have gone down a lot since 2010. In 2025, they are about \$200–\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment The U. The suite of. Ember provides the latest capex and Levelised Cost of Storage (LCOS) for large, long-duration utility-scale Battery Energy Storage Systems (BESS) across global markets outside China and the US, based on recent auction results and expert interviews. In 2025, the global average price of a turnkey battery energy storage system (BESS) is US\$117/kWh, according to the Energy Storage Systems Cost Survey 2025. Are you looking for access to pricing, availability, CapEx, and OpEx information to rapidly evaluate viable AC and DC integrated battery configurations from 20+ vendors?

Anza's strong vendor relationships and 20+ years of industry experience enable us to aggregate pricing and product information.
