Dark horse in the solar inverter track

Overview

The "dark horse" of solar energy storage with a market value of over 60 billion yuan is suspected of "fraud". Recently, some foreign media reported that the micro inverters produced and sold by Deye Co. has found Trojan horse communication devices in Chinese-made solar power inverters. Recent reporting. In late April, a sudden and massive blackout plunged parts of Spain and Portugal into darkness after just 2 gigawatts of power dropped from the grid--an amount small enough to be caused by a single infrastructure failure. A disturbing security threat has emerged within America's renewable energy infrastructure as investigators uncover rogue communication.

Dark horse in the solar inverter track

Chinese 'Kill Switches' Found in US Solar Farms

The U.S. has found Trojan horse communication devices in Chinese-made solar power inverters. Inverters are used to change DC power from solar panels/battery racks, into AC power for ...

Another dark horse runs through the whole solar industry

LONGi Solar, in collaboration with Jiangsu University of Science and Technology and Curtin University, has unveiled HJT solar cells that are thinner, more flexible, and more efficient.

The Trojan Horse In The Grid: Chinese Kill Switches Found In Solar

...

Now, the United States is waking up to a far more alarming possibility--not an accident, but an attack. Investigations have revealed that Chinese-manufactured power inverters installed in ...

Rogue communication devices found in Chinese solar power inverters

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication

SOLAR TECHNOLOGY: CHINA'S TROJAN HORSE

China's solar inverter Trojan horse demonstrates that it's time for our leaders to respond with greater urgency to protect us from this obvious CCP threat. Thanks to Anders Corr writing in ...

Beijing's Backdoor Plot Hits U.S. Infrastructure

A disturbing security threat has emerged within America's renewable energy infrastructure as investigators uncover rogue communication devices concealed inside Chinese ...

Chinese Solar INVERTERS Found Containing "Trojan Horse" Comms

These Trojan Horse devices can be turned on and controlled remotely and can be used to destabilize public energy

grids, potentially leading to massive blackouts like the recent one in Spain.

Chinese Made Solar Power Inverters Connected To US Power Grid

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

The "dark horse" of solar energy storage with a market value of over ...

Recently, foreign media reported that the micro inverters produced and sold by Deye Co., Ltd., a Chinese inverter manufacturer, encountered a certification fraud crisis.

Trojan Currents: Chinese Embedded Threats , RealClearDefense

Recent reporting has revealed that certain Chinese-manufactured solar inverters installed across the U.S. grid

contain undocumented communications
modules-essentially Trojan horse ...
