

KREATYWNY ENERGY POLSKA

Demand response croatia

Overview

Croatia's demand response management system (DRMS) market is growing as the country seeks to enhance energy efficiency and integrate renewable energy sources. DRMS helps manage electricity demand during peak times by encouraging consumers to adjust their usage. Government policies promoting. Peak stress often occurs in the evening, when solar output declines but demand remains elevated due to cooling and tourism activity. This creates steep ramps that must be covered by hydro releases, gas generation, or imports. Only active consumers can participate in demand response programs. As part of Dream_pace ´s goals to introduce drt in Croatia, the guidelines and tender procedures for the drt service has been prepared for the Split-Dalmatia County region, in close collaboration with two towns: Dicmo and Dugopolje.
