

Does the battery cabinet come with a circuit breaker

Overview

The battery cabinet comes complete with everything needed for install including conduit fittings, wire and terminals. Short circuit protection is provided by a circuit breaker inside the cabinet which also provides a convenient way to test for charger fail alarm. It can be mounted in a relay rack or on the wall. Four cabinet sizes are available to accommodate the various types of batteries in this range of power. All battery cabinets are constructed from heavy gauge steel with a durable welded frame and acid resistant powder coated finish available in a wide range of colors. Designed to backup the NetSure 2100 Series and NetSure 5100 power system with integrated distribution, as well as NetSure 211 and NetSure 502 systems, these cabinets are equipped with a circuit breaker alarm signal wire and a connectorized cable to attach the cabinet to the power system. A 40A DC. breaker is provided under load. Electrical cabinets must be removed prior to installation to release toxic electrolyte which is harmful to the skin and eyes. In addition, batteries can vent potentially explosive gas. The external battery cabinet (EBC) is used to house external batteries for the UPS.

Does the battery cabinet come with a circuit breaker

UPS Battery Cabinets

Once the battery cabinet is configured with UVR access, wait until the UPS outputs its rated UVR voltage, prior to turning on the circuit breaker. o UVR/Shunt Pin 1 = POSITIVE (+) Polarity
