

# Egypt electric vehicle safety

## Overview

---

This study evaluates the feasibility and visibility of electric vehicles (EVs) in Egypt, addressing critical research gaps and proposing actionable strategies to drive adoption. Ranked 28th in the Global Electric Mobility Readiness Index (GEMRIX) 2023, Egypt has been classified as a “starter market” with a score of 32 out of 100. Cairo's move to localise the production of electric vehicles has several benefits, including boosting employment and reducing pollution. And it is well-positioned to overcome any challenges. last update on 05 Dec 2024 A hard currency shortage and the devaluation of the Egyptian pound have made it. As the world pivots toward greener transportation, Egypt has been eyeing becoming a key player in the global electric vehicle (EV) market. The government's ambitious plan, outlined in the Egypt Vision 2030, aims to produce no less than 500,000 electric cars annually by the end of the decade.
