

Electric vehicle costs argentina

12.8V6Ah

Nominal voltage (V):12.8
Nominal capacity (ah):6
Rated energy (WH):76.8
Maximum charging voltage (V):14.6
Maximum charging current (a):6
Floating charge voltage (V):13.6~13.8
Maximum continuous discharge current (a):10
Maximum peak discharge current @10 seconds (a):20
Maximum load power (W):100
Discharge cut-off voltage (V):10.8
Charging temperature (°C):0~+50
Discharge temperature (°C): -20~+60
Working humidity: <95% R.H (non condensing)
Number of cycles (25 °C, 0.5c, 100%doD): >2000
Cell combination mode: 32700-4s1p
Terminal specification: T2 (6.3mm)
Protection grade: IP65
Overall dimension (mm):90*70*107mm
Reference weight (kg):0.7
Certification: un38.3/msds

Overview

Key View: We have recently revised our forecasts for Argentina's EV market and now expect passenger EV sales to grow from 666 units in 2024 to 2,020 units in 2025 – a 210% y-o-y increase – primarily due to the elimination of tariffs on electric and hybrid vehicle. Key View: We have recently revised our forecasts for Argentina's EV market and now expect passenger EV sales to grow from 666 units in 2024 to 2,020 units in 2025 – a 210% y-o-y increase – primarily due to the elimination of tariffs on electric and hybrid vehicle. For a country with a burgeoning electric vehicle (EV) Market, making the correct policy, infrastructure, and production decisions now could spur adoption in the coming years. There have been early signs of industry growth, but adoption rates remain low. In 2022, fewer than 500 electric vehicles. Argentina's electric vehicle (EV) market is undergoing a dramatic shift following the government's decision in January to slash import tariffs on electric and hybrid vehicles. 12 Billion in 2024 and is projected to reach USD 100. 28% during the forecast period 2026 to 2032. Buenos Aires, the capital city, is witnessing a growing interest in EVs, albeit with some challenges. While electric cars are gaining attention, their adoption remains relatively low due to. Import tariff reduction on electric and hybrid vehicles below a specific FOB value directly increases consumer access and drives demand for lower-cost electrified models. Meet some of our key people.
