# Electricity bills beirut

## Overview

---

Instead of a single utility bill, Lebanese families are forced to pay for two separate sources of electricity: a limited supply from the state-owned Electricité du Liban (EDL), and a second, far more expensive bill for private generator subscriptions that have become a lifeline. Instead of a single utility bill, Lebanese families are forced to pay for two separate sources of electricity: a limited supply from the state-owned Electricité du Liban (EDL), and a second, far more expensive bill for private generator subscriptions that have become a lifeline. The new power plants at Zouk an Jiyeh were the first of these projects, that were respectively put into service on February 27 and Maand led to the increase the electric supply up to three additional hours per day; other projects shall follow, precisely the main substations and their. Starting May 2023, the calculation of electricity bills will be based on the official exchange rate determined by the Central Bank (BDL). As for the fuel ship expected to refuel the power plants and prevent a total blackout, it is supposed to dock in Lebanon before December 28. As of May 2023. Human Rights Watch concludes that the internationally-protected right to an adequate standard of living includes the right of everyone, without discrimination, to sufficient, reliable, safe, clean, accessible, and affordable electricity. Access to electricity is critical to ensuring other basic. This month Electricite du Liban (EDL) began collecting the higher tariffs it announced in November, representing the first time in almost three decades that Lebanese have seen a rate increase on their power bill.
