

Electricity consumption bhutan

Overview

In terms of electricity consumption, Bhutan is witnessing a modest increase. What share of Bhutan's population has access to electricity?

Electricity is a good that adds massive value to modern life: from having light at night; to washing clothes; cooking meals; running machinery; or connecting with people across the world. Many would argue that it is a crucial for poverty. The latest value from 2023 is 11.52 billion kilowatthours in 2022. This remarkable achievement positions Bhutan as a global leader in clean electricity generation. Bhutan's domestic electricity demand is anticipated to surge by 232 percent by 2026, significantly outpacing expected export demand, according to June projections from the finance ministry.

Electricity consumption bhutan
