

# Energy conservation slovakia

- ☑ High energy density and long cycle life
- ☑ Modular structure

No need to replace the battery

Shorter charging time

Meets 99% EV car

## Overview

---

Today, sustainable energy has become the cornerstone of economic and environmental growth. Supported by the European Union and local innovation, Slovakia invests heavily in solar, hydropower and wind systems to reduce emissions and strengthen energy security. Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030. Slovakia successfully met its 2020 energy efficiency target. The IEA peer review of the Slovak Republic took place from 23 to 30 October 2023. With nuclear energy contributing the largest share at approximately two-thirds of the total electricity, Slovakia stands as a shining example of. The Slovakia energy efficiency summary presents energy efficiency trends and policies by sector: Overview, Buildings, Transport and Industry. 34 Mtoe, which represents a decrease of 6.
