# **Energy storage policy mexico city**

## Overview

---

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems accounting for at least 30% of their capacity, with a minimum storage duration of three hours. The LESE replaces an. A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028. Electric energy storage has become a crucial component in the transition to more sustainable, reliable and efficient energy systems.

## Energy storage policy mexico city

### Mexico Enacts New Laws for the Power Sector , Norton Rose Fulbright

CENACE must incorporate guidelines for operating energy storage systems into the existing market rules. The energy storage systems may offer energy or associated products, ...
