

## Overview

---

The push is reinforced by Tokyo's 2025 regulation requiring solar panels on new homes, and the launch of virtual power plant (VPP) programs—slated to begin in fiscal 2026—that will let households sell surplus energy to the grid. In the commercial space, Japan's battery storage market was valued at. Japan's primary energy self-sufficiency ratio in fiscal 2022 was only 12.6%, which is lower than other OECD (Organisation for Economic Co-operation and Development) countries. Storage technologies have the potential to resolve these issues and help advance Japan into the next stage of its renewable energy transition. This briefing examines the regulatory framework for energy storage in. The increasing generation of renewables on the Japanese grid has led to various support policies and CAPEX subsidy schemes to support the deployment of grid-scale Battery Energy Storage (BESS). In August 2022, METI unveiled the “Storage Battery Industry Strategy,” charting an exciting vision for the future of. ICLG - Renewable Energy Laws and Regulations - Japan Chapter covers common issues in renewable energy laws and regulations - including the renewable energy market, sale of renewable energy and financial incentives, consents and permits, and storage. Overview of the Renewable Energy Sector 2.
