

Europe renewable energy kenya

Overview

Team Europe, under the European Union's Global Gateway strategy, has committed to a significant investment in Kenya's renewable energy sector. At a ceremony in Nairobi, two key financing agreements were signed to support the country's clean energy transition. Credit: Matyas Rehak / Alamy Stock Photo Lire en français In. Central to the deal is the redevelopment of the Gogo Hydropower Plant in Migori County, with a €35 million sovereign loan from Germany via KfW. The project will boost the plant's generation capacity from 2 MW to 8.6 MW, stabilising power supply in western Kenya and significantly reducing outages. Kenya exports renewable energy technology, modernises transport, and drives innovation. Standing on a pedestrian bridge above one of Nairobi's busiest roads, Ann Masiga watches a stream of private minibuses ferry commuters to their homes around the city. Even a few metres above the traffic, the air. The SWITCH to Green Initiative aims at facilitating the transition to an inclusive green economy that generates growth, creates decent jobs, and helps reduce poverty.
