Overview

The Solomon Islands Renewable Energy Development Project plans to finance new solar farms in Guadalcanal and Malaita provinces, along with a utility-scale grid-connected energy storage system in Honiara, the country's capital. It will also support a pilot for rooftop solar at two. The clean energy sector in the Solomon Islands is emerging, with several initiatives showing promise despite facing significant challenges. The country, composed of 992 islands in Melanesia, has a population of approximately 726,799, with about 76% having access to electricity. Currently, the International Renewable Energy Agency (IRENA) is an intergovernmental organisation that supports countries in their transition to a sustainable energy future and serves as the principal platform for international co-operation, a centre of excellence, and a repository of policy, technology. The Solomon Islands, an archipelago nation in the South Pacific with more than 700,000 people, faces unique energy challenges due to its geographical spread and reliance on imported fossil fuels. It is a low-lying coastal country, and. HONIARA, SOLOMON ISLANDS (12 September 2024)- The Asian Development Bank (ADB) and the Government of Solomon Islands are joining other partners to help Solomon Islands transition to renewable energy with a transformational project that will accelerate renewable energy generation and battery storage. Prime Minister Manasseh Sogavare today has launched the Solomon Islands Renewable Energy Roadmap - announcing major reforms in the energy sector in the areas of policy, legislation, regulation, institutional, financial and management arrangements. The new Roadmap provides the technical pathway and.

Renewables Readiness Assessment: Solomon Islands

The investment market in the Solomon Islands remains donor dependent due to the small market size and the lack of financing mechanisms for renewable energy and energy efficiency technologies.
