# Ev charger points europe

## Overview

---

By the end of Q2 2025, Europe surpassed a milestone of more than 1.05 million publicly accessible charging points, up from about 1 million at the end of Q1. This rapid growth reflects both strong EV adoption and the urgency with which governments, utilities, and private operators are investing in. A decade ago, in 2015, the number of EV charging points in Europe was around 67,000. See availability, connector types, power levels and pricing at a glance — and start charging instantly through the easyCharging app or with an optional RFID key tag. Perfect for cross-border EV travel — find reliable AC/DC chargers.
