Georgia Telecommunications Base Station Power Requirements

Overview

In January 2025, after several months of meetings between PSC Staff, Commissioners and Georgia Power officials, the Commission approved a new rule for Georgia Power (order and press release). The rule allows for minimum billing requirements and longer contract terms for new large-load. Janu- (ATLANTA) The Georgia Public Service Commission voted unanimously on Thursday to approve a new rule that allows Georgia Power to charge new data centers in a manner that will protect ratepayers from cost shifting. It is intended to provide guidance only regarding the design and installation of electric services and revenue metering equipment on the Georgia Power Company system. This book is. In 2022, Georgia Power estimated it would need to increase power generation by only 400 megawatts over the next seven years. By 2023, with the proliferation of data centers, that estimate grew to 6,600 MW. Temporary line extensions are defined as service to events like fairs, carnivals, fruit stands, and similar locations or structures where facilities may be removed or not used and the meter disconnected aft lease for an existing light.
