

**KREATYWNY ENERGY POLSKA**

# **Grid-connected solar solar container power supply system in Auckland New Zealand**

## Overview

---

The combination of diverse energy generation and storage, rapid deployment and remote monitoring makes PowerCrate an ideal solution for your remote energy needs: off-grid, edge of grid or boosting energy resilience in an uncertain climate. Taspac Energy is NZ's premium supplier of Solar PV and Energy Storage Solutions. 100% Kiwi owned, Taspac was founded in 2014 with a very simple goal - to provide best-in-class renewable energy solutions to New Zealand solar installers and electricians, backed up with a high level of local sales. Endless Energy offers consultation, design, optimisation, engineering, financing, installation, integration, maintenance and lifetime monitoring. A grid-connected solar system in New Zealand uses north-facing PV panels to convert sunlight into AC energy for homes, allowing excess energy to be sold. There are small-scale systems available to enable you to generate your own power, store it and sell it back to the grid. Systems such as solar panels and small wind turbines with batteries are becoming increasingly available and affordable.
