PROTECTION IP54/IP55

PCS EMS

BATTERY /6000 CYCLES

Overview

The size of your outdoor screen will largely depend on your viewing preferences, environmental conditions, and the overall space you have available. Choosing the right screen size is essential for a great outdoor movie experience. Generally, for a single viewer, a size of about 120-140 inches will be suitable. However, larger screens can create a more immersive atmosphere. For an outdoor home cinema build you'll likely need to have at least 40ftL for spaces with moderate levels of ambient light and 60ftL for environments with high levels of ambient light.
