# **How many watts does a solar street light have in total**

## Overview

---

Solar street lights typically range between 30 to 200 watts, with variability based on the design and intended purpose, 2. wattage affects brightness and efficiency, 3. But when it comes to highways or industrial zones, you're likely looking at 60 watts or more. The beauty is, unlike traditional street lights. The power range of an integrated solar street light is usually between 5W and 120W. High-lumen LED chips, monocrystalline solar panels, MPPT charge controllers, and durable materials ensure long-lasting performance.
