How many watts of solar lights are needed for the garden

Overview

The wattage of solar garden lights is usually between 1 and 5 watts, and the specific wattage should be selected according to the size of the garden, lighting needs and sunlight. Choose 1-2 watts for small courtyards or low lighting needs, 3-5 watts for large courtyards or high. How many watts does a garden solar light supply?

1. A garden solar light typically supplies between 0. Because Wattage is not for measuring brightness. It measures electricity consumption. The output light could be low even if the wattage is higher as it depends on the energy efficiency of the fixture. A soft glow for a flowerbed requires far fewer lumens than a light designed to illuminate a dark pathway. A greater wattage will be needed for lights in regions with less trees or structures blocking sunlight than for lights in areas with shadows.
