

# How much does a 10kW flexible solar panel cost

## Overview

---

On average, a 10 kW solar panel system costs \$25,400, according to real-world quotes on the EnergySage Marketplace from 2025 data. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are available in your area. We'll outline everything you need to know about 10kW solar systems below, including how much they cost, what they can power and how to determine if a 10kW solar energy system is right for you. Depending on where you live, you can expect the system to produce between 11,000 and 15,000 kWh of electricity every year!. On average, a 10kW solar system will produce about 30 to 50 kilowatt-hours (kWh) per day. That is about 1,000 to 1,500 kWh per month, or about 12,000 to 18,000 kWh per year. It can take up space between 55 to 70 square meters. Buy the lowest cost 10kW solar kit priced from \$1. For home or business, save.
