How much does a 2 2-meter photovoltaic panel cost

Overview

As of 2026, the average cost of residential solar panels in the U. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. How much does it cost to install and manage solar panels?

According to studies by the U. Cost will vary depending on. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Solar panel cost per watt and the cost per square meter variously tell about the efficiency and cost.
