How much is the capacity of outdoor solar power hub in arequipa peru

Overview

Located in the Arequipa region, the San Martín solar park boasts an impressive capacity of approximately 300 megawatts (MW). Inaugurated by Spain's Zelestra, this facility represents a major leap forward for Peru's energy infrastructure. The plant delivers 300 megawatts of electricity, enough to power about 440,000 homes, using over 450,000 solar panels that cover more. In 2012, Spanish company T-Solar built Peru's first utility-scale photovoltaic power plant in La Joya, installing 55,704 solar panels to generate 22 megawatts of power. Now, construction is underway on the Illa solar power plant in Arequipa, which will leapfrog the San Martín plant to become the. Peru's largest solar installation—the 300 MWdc San Martín plant—has officially entered commercial operation in Arequipa's La Joya district. Developed by Zelestra and completed in under 18 months, the plant delivers power to Kallpa Generación through a long-term PPA. Developed by the Spanish company Zelestra, the project is considered the largest of its kind in the country and. The Peruvian power generator Inkia Energy has received environmental approval to expand its Sunny solar power plant located in La Joya, in the Arequipa region (southern Peru) from 228 MW to 338 MW. The Sunny solar power plant is currently under development by Inkia Energy's wholly-owned subsidiary.
