How to generate full power of solar power in Oxygen Not Included DLC

Overview

well the Ceres asteroid peaks at 10k lux and you need 50k lux over 7 tiles or equivalent to get full power. The more light it receives, the more power it generates. Requires. Here is a comparison of a fully exposed solar panel and 7 panels stacked vertically and overlapping 6 tiles, so only one tile is exposed: After generating power during one cycle a fully exposed solar panel produced 22,66% less power than a 7 panels with only one tile exposed. As you can see a fully. the solar panel is not generating electricity correctly, the maximum amount they are currently able to generate is around 70w, in the middle of the cycle Bunker Científico Desafortunado Cycle 253. log Unavailable your asteroid has low sunlight. Just wanted to share my solar power build now that the DLC is out (this is from the alpha) Each set of 3 solar panels connect to a transformer. The output from the transformer is heavy watt wire and onto jumbo. You can help Oxygen Not Included Wiki by expanding it. Collect solar energy before takeoff and during flight.
