

How to install plastic corner protectors for photovoltaic panels

Overview

To install corner guard, apply heavy duty adhesive on each wing in a zigzag pattern. Position corner guard on wall and move around slightly to spread adhesive, then remove corner guard from wall for one minute to let the adhesive set. Solar panel corner protectors play a vital role in preserving the structural integrity and performance of photovoltaic systems. This protection is significantly useful especially when you. There are two specific ways of installing your corner guards. If necessary, remove all traces of grease and oil from wall surfaces using a good cleaning solvent. The strongest adhesion is using screws with pre-drilled holes followed by nails and double-sided tape.
