## Overview

---

To dismantle an old solar panel, one must adhere to several key steps: 1. Gather the necessary tools for the process; 3. It is imperative to emphasize that. But here's the kicker - 6 million metric tons of PV panel waste will accumulate globally by 2030, according to the International Renewable Energy Agency. From inspecting and preparing to the final decision of reinstallation or disposal, each phase de minimis, silicon, and metal, are recyclable. This comprehensive process includes dismantling equipment such as racking systems, wiring, inverters, transformers, and foundations. The rapid growth of solar power means a significant increase in end-of-life PV modules in the coming decades.
