

# How to perform photovoltaic panel inspection

GEL Battery

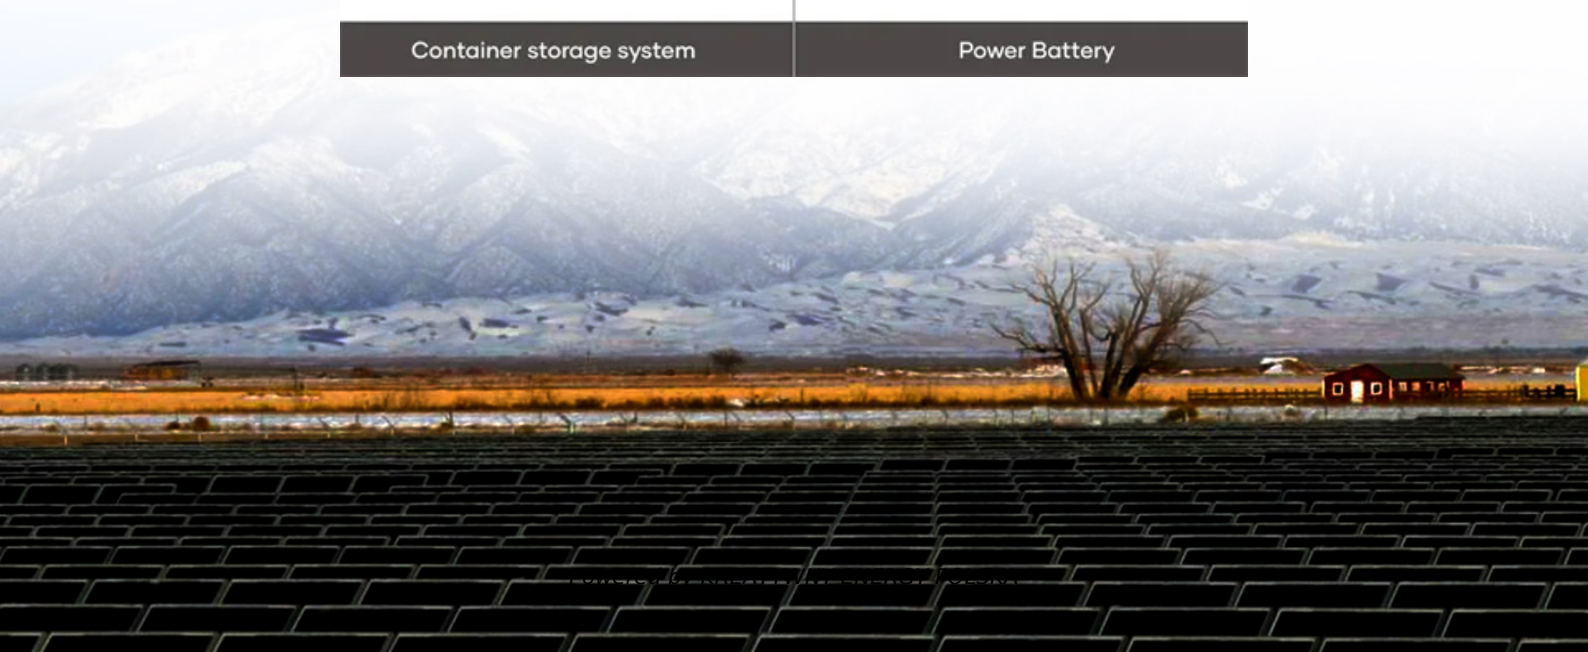

Lithium Battery

Container storage system

Power Battery

## Overview

---

You should inspect your solar panels every six months by checking for physical damage, cleaning debris, monitoring power output, and examining electrical connections. There are two types of solar panel system inspections: the ones for system compliance and the ones for O&M. Understanding and doing them properly leads to happier clients and a healthier bottom line for solar companies. This step—overseen by the local Authority Having Jurisdiction (AHJ)—ensures that the installation aligns with the approved plan set and complies with all safety codes. Discover safety procedures, maintenance checklists, and expert tips for optimal system performance. Proper photovoltaic system maintenance ensures optimal energy. However, before your new solar system can start powering your home, it must pass a crucial step: the solar panel inspection. To help you navigate this important phase, we've compiled a comprehensive.
