# **Increased renewable energy penetration santo domingo**

## Overview

---

Dominican Republic's energy sector shines with new solar projects led by Vice President Raquel Pena, boosting renewable capacity and exceeding daily demand. President Luis Abinader announced that electricity generation in the Dominican Republic will increase significantly in the coming months, marking a record expansion for his administration. The plan includes adding 600 megawatts from new projects, including Energía 2000 (420 MW), Energas (120 MW). The Dominican Republic is experiencing an unprecedented surge in investment in its energy sector, attracting substantial foreign and local capital, particularly in renewable energies. A staggering 24 new power generation plants or parks are currently under construction across the nation. Sitting a few metres from the Girasol Solar Park, the largest photovoltaic power plant in the Dominican Republic and the Caribbean, Carlos Suazo claims that this majestic infrastructure is responsible for the increased heat in his community. Like Suazo, several other residents in Yaguata, a town in. Despite the present administration's efforts to increase the installed capacity of electricity generation from renewable sources, the electric power sector continues to be one of the most significant problems affecting the Dominican economy. It aims to use 25% more renewable power by 2025.
