# **Industrial frequency three-phase inverter**

## Overview

---

Three-phase motor inverters, also known as VFDs, provide precise speed control, torque, and energy efficiency for CNC machines, conveyors, and pumps. This paper compares two- and three-level AC/DC converters for three-phase industrial applications, focusing our analysis on two-level, T-type, active neutral point clamped (ANPC), neutral point clamped (NPC) and flying capacitor (FC) topologies. Our evaluation includes system trade-offs such as.

The AFW900 is the panel-mounted frequency inverter solution for the drive and control of three - phase induction and permanent magnet motors. With the built-in CFW900 frequency. 75kw (1 hp) frequency drive inverter, 3 phase inverter 240V, 415V, 480V to be optioned. Rated current 21A at 380v~ 480V, 3. 3 phase inverter with sensorless vector control can work at (-10°C, 40°C). Isolated outputs so you can connect in a "Y" configuration or left as three individual isolated outputs.
