

Install the photovoltaic panels level

Overview

Most panels measure 65 inches by 39 inches, so plan rail spacing accordingly. Dig holes 3-4 feet deep below the frost line in your area. Before we get into the nitty-gritty of how to install solar panels on your rooftop, balcony, or grounds of your property, it's crucial to understand that photovoltaic modules (PV) — like solar panels and shingles — require additional components to operate. Professional installers refer to essential. Solar panel installation costs range from \$15,000 to \$30,000 for an average American home, with a payback period of 6 to 10 years depending on your state's incentives and sun exposure. This comprehensive guide walks you through every step of your solar project, from initial assessment to system. Install mounting rails horizontally across the standoffs. Rails must be level and properly spaced to support panel dimensions.
