International New Energy Storage Industry

Overview

Global energy storage additions are on track to set another record in 2025 with the two largest markets – China and US – overcoming adverse policy shifts and tariff turmoil. By the end of December 2025, China's cumulative installed capacity of new energy storage technologies including lithium-ion reached 144.7GW, representing an 85% year-on-year rise. Annual deployments are also set to scale in Germany, the UK, Australia, Canada, Saudi Arabia and Sub-Saharan Africa, driven. The multi-billion-dollar Energy storage industry is expected to grow from around \$22B in 2023 to about \$134B by 2031, with a projected CAGR of 22. While oil, coal, and natural gas still dominate the global energy sourcing in terms of terawatt-hour yield, renewables are rapidly.

International New Energy Storage Industry

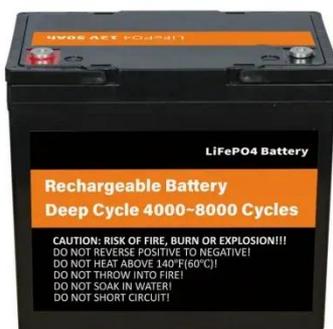

Battery storage outlook boosted by thirst for firm power

Battery storage can also be deployed faster than new gas or nuclear plants. Join hundreds of senior executives across energy, industry and finance at Reuters Events Global Energy Forum 2026.

Global energy storage market: review and outlook-Industry-InfoLink

In 2025, the global energy storage market is projected to maintain its growth trajectory, with new installed capacity reaching 221.9 GWh, up 26.5% YoY, as InfoLink forecasts.

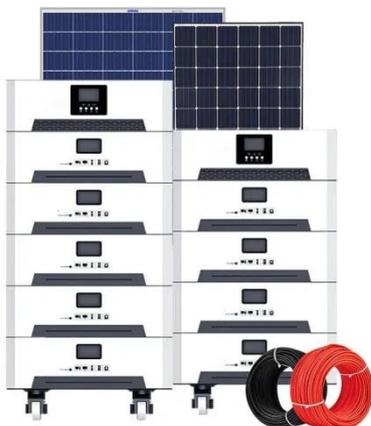

Energy Storage Industry Report

Discover the rapid growth and key trends in the multi-billion-dollar energy storage industry, projected to reach \$134B by 2031, driven by renewable energy advancements and ...

Global Energy Storage Market

The report provides a current market overview of the global energy storage industry, including recent trends, drivers, challenges, and outlook in major countries across Europe and the Americas. The ...

Energy Storage Rides a Wave of Growth but Uncertainty Looms: A ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

Global Energy Storage Boom: Three Things to Know

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.

Five trends for energy storage as global market passes 100 GW

A new report from Wood Mackenzie identifies five key trends that will define the energy storage industry in 2026, including supply chain restructuring and

the rise of non-lithium batteries.

Top 10 Energy Storage Companies to Watch in 2025

The article discusses top 10 energy storage companies that are working on new solutions to support global energy needs.

Energy Storage Market Size, Growth, Share & Industry Trends

Batteries accounted for 53.84% of the 2025 energy storage market size, anchored by LFP and growing sodium-ion volumes, while hydrogen storage is forecast to expand at a 38.50% ...

Energy-Storage.News

Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy
