

Is it a crime to smash photovoltaic panels

Overview

Unfortunately, what should be a virtuous initiative is giving rise to a new crime wave, with police data showing a staggering 48% rise in solar panel and cabling theft from 2021 to 2022. SAN JUAN COUNTY, Utah (ABC4) — A man from New Mexico was arrested in Utah after allegedly smashing solar panels in San Juan County. 66-year-old Stephen McRae was arrested and booked on two counts of property damage/destruction worth more than \$5000, which are second-degree felonies, after allegedly. According to a study by the National Renewable Energy Laboratory (NREL), the average cost of replacing a stolen or damaged solar panel can range from \$500 to \$1,000 per panel, depending on the size and type of system. Furthermore, the disruption in energy production caused by stolen or damaged. While once a rather niche concern, solar crime is increasingly making headlines, particularly at commercial-scale installations. According to Spotter Global, theft from solar farms was expected to rise throughout 2024, with growing demand for panels making them both easier to sell and more valuable. The financial cost of crime to the agricultural industry was brought into sharp focus last year with NFU Mutual's 2023 Rural Crime Report, estimating that £49. 5 million worth of equipment was stolen and resold. "There's a perfect environment for criminals.
