

Is the construction site allowed to use outdoor power supply

Overview

Opt for industrial portable power stations rated especially for outdoor and wet environments. You must use heavy-duty cables with UL listings for temporary sites. However, exposure to weather, frequent relocation, rough use and other conditions not normally encountered with conventional wiring systems necessitate special consideration not required in other applications or in completed structures. Not only do they keep work moving quickly and efficiently, they ensure worker safety and code compliance. The first step is to consult the experts. Look for temporary power companies to work with that can help you. Effectively managing temporary power safety on any construction or demolition job site is a non-negotiable responsibility for every qualified electrician.

Is the construction site allowed to use outdoor power supply

Managing Electrical Safety for Temporary Power on ...
