

KREATYWNY ENERGY POLSKA

Is the mosquito fumigator powered by solar energy

Overview

This versatile device charges in 9 hours of sunlight and provides up to 30 hours of mosquito control or 15 hours of lighting. It uses 8 white LEDs for illumination and 4 UV LEDs to attract and eliminate pests safely and effectively, without chemicals. For years, solar mosquito repellents have lacked the power and reliability we need, which is why this new model deserves your attention. The deadliest animal in the world isn't a shark or a snake - it's actually the mosquito.

Is the mosquito fumigator powered by solar energy
